Pediatr Cardiol 17:425–429, 1996

Subject Index

Abbreviations: Case Report - CR; Letter to the Editor - LE

Absent pulmonary valve, magnetic resonance imaging of (CR); 35
Accessory atrioventricular connections, electrogram patterns associated with radiofrequency ablation of; 137
Age, effect on QT intervals; 135
Albumin, as contrast media in Doppler echocardiography of systolic pressure; 175
Amiodarone, ventricular tachycardia managed by (CR); 112
Anastomosis, extended aortic arch, balloon aortoplasty for restenosis after (CR); 275
Anatomy, quantitative, of atrioventricular septal defect; 97
Angiography, abnormal vascular structures revealed by (CR); 57
Anomalous coronary artery, in association with aorticopulmonary window (CR); 316
Anomalous left coronary artery, from pulmonary artery, mitral valve replacement in infants with (CR); 271
Anomalous left coronary artery syndrome, hemopericardium and cardiac tamponade as presenting findings (CR); 198
Anomalous left pulmonary artery, development of pulmonary artery sling and (CR); 319
Aortic arch, double, with retroesophageal left aberrant innominate artery (CR); 403
type B interrupted, balloon aortoplasty after anastomosis for (CR); 275
Aortic arch interruption, one-stage repair of (CR); 122
Aortic coarctation, exercise-induced hypertension after surgery for; 301
MRI showing remodeling of aorta following balloon angioplasty of; 184
percutaneous transluminal balloon angioplasty of (CR); 346
Aortic stenosis, Inoue versus standard balloon catheter technique for; 15
supravalvular, in twins (CR);125
Aortic valve cusp, perforated by Rashkind umbrella (CR); 419
Aortic valve stenosis, ventricular workload and physiology of; 155
Aorticopulmonary window, anomalous origin of coronary artery in association with (CR); 316
Aortopulmonary window, one-stage repair of (CR); 122
Arrhythmogenic right ventricular dysplasia, left ventricular involvement in (CR); 40
Atenolol, for supraventricular tachycardia, efficacy and safety of; 231
ATPase6 gene mutation, Leigh syndrome and; 388
Atrial appendages, juxtaposed, echocardiographic features of (CR); 63
Atrial septal defect, secundum type, body surface isopotential T map of right ventricular volume in; 237
pulmonary vascular disease in patients with (CR); 265
Atrial septum, static balloon dilatation of (LE); 349
Atrioventricular canal, Noonan syndrome and (LE); 278
Atrioventricular septal defect, Ebstein anomaly and (CR); 67
quantitative anatomy of; 97
Autosomal dominant inheritance, of valvar pulmonary stenosis (CR); 408
Balloon angioplasty, MRI shows remodeling of aorta following; 184
percutaneous, for restenosis after extended aortic arch anastomosis (CR); 275
percutaneous transluminal, of abdominal aortic coarctation (CR); 346
Balloon catheters, Inoue versus standard, for congenital aortic valve stenosis; 15
Balloon dilatation angioplasty, internal jugular vein approach in; 82
Balloon dilatation, of atrial septum (LE); 349
Biopsy, improvement from prednisone treatment proved by (CR); 115
Blalock–Taussig shunt, Salmonella typhimurium infection of (CR); 330
Body surface isopotential T map, right ventricular overloads assessed by; 237
Bronchoscopy, pulmonary sling evaluated by as presenting finding of anomalous left coronary artery syndrome (CR); 201
Calcium channel blockers, effect on paralysis and ventricular tachycardia (CR); 31 Cardiac arrhythmia, after chloral hydrate (LE); 422
Cardiac catheterization, oxygen consumption during; 207
pediatric, designing a laboratory for; 279
Cardiac morphogenesis, in trisomy 16 mouse; 21
Cardiac tamponade, as presenting finding of anomalous left coronary artery syndrome (CR); 198
as result of intrapericardial lymphangioma (CR); 129
Cardiac tumor, presenting as intracranial pressure (CR); 260
Cardiomyopathy, hypertrophic, clinicopathologic characteristics of; 295
hypertrophic, complication of glucocorticoid and insulin therapy (CR); 335
multicore myopathy associated with (CR0; 53
Leigh syndrome and; 388

restrictive, isolated noncompaction of ventricular myocardium presenting as (CR); 43
Catheter ablation, electrographic patterns associated with success of; 137
Cavopulmonary anastomosis, pulmonary arteriovenous fistulas after (CR); 46
Chloral hydrate, cardiac arrhythmia after usual dose of (LE); 422
Chylopericardium, secondary to intrathymic lymphangiomatous malformation (CR); 415
Coil embolization, small patent ductus arteriosus with; 181
Computerized simulation, optimized dosing regimen based on (CR); 112
Congenital cardiac anomalies, with multiple lesions, echocardiographic diagnosis of; 308
Congenital diverticulum, left ventricular, echocardiogram of (CR); 254
Congenital heart defects, effect of nitric oxide during cardiac catheterization for investigating; 246
immunodeficiencies and; 143
oxygen consumption and; 207
pathologic lung function in; 314
Congenital heart disease, cyanotic, iron deficiency in children with; 150
in partial trisomy 8p (LE); 204
rapid appearance of inflammatory pseudotumor in infant with (CR); 400
respiratory syncytial virus infection and; 163
serotonin in children with pulmonary hypertension secondary to; 214
ventilatory threshold and; 7
Congestive heart failure, in infants with ventricular septal defect; 383
Cor triatriatum, sinus venosus defect associated with (CR): 60
Coronary artery abnormalities, after Kawasaki disease, long-term outcome of; 71
Coronary artery aneurysms, aerobic exercise function of patients with; 226
Coronary artery stenosis, in twins (CR); 125
Data acquisition, in pediatric cardiac management; 279
Diastolic ventricular interdependence, open pericardium and; 77
Dobutamine, effect on left ventricular diastolic filling; 220
Doppler echocardiography, aortic narrowing during exercise predicted by; 370
contrast-enhanced, systolic pressure of pulmonary artery and right ventricle by; 175
left ventricular diastolic filling measured by; 220
repeatability of pulmonary arterial pressure estimated by; 360
validation of proximal isovelocity surface area method by; 351
Down syndrome, effect on hemodynamic response to pulmonary artery banding; 375
morphogenetic alterations during endocardial cushion development and; 21
Duchenne's muscular dystrophy, frequency domain analysis of SA-ECG in patients with; 91
Ebstein anomaly, complete atrioventricular septal defect and (CR); 67in siblings (CR); 327
Echinococcosis, cardiac, with multivisceral involvement (CR); 268
Echocardiography, arrhythmogenic right ventricular dysplasia diagnosed by (CR); 40
congenital cardiac anomalies with multiple lesions diagnosed by; 308
intracardiac yolk sac tumor evaluated by (CR); 196
left ventricular end-diastolic dimension measured by; 169
of absent pulmonary valve (CR); 35
of congenital left ventricular diverticulum (CR); 254
of left juxtaposed atrial appendages (CR); 63
Electrogram patterns, associated with radiofrequency ablation of accessory pathways; 137
Endocardial cushion, morphogenetic alterations during development of; 21
Endocardial fibroelastosis, left ventricular pannus after mitral valve replacement for (CR); 257
Endocarditis, infective, caused by *Rahnella aquatilis* (CR); 108
of Blalock–Taussig shunt in infant (CR); 330
Endomyocardial biopsy, features of hypertrophic cardiomyopathy revealed by; 295
Enteropathy, protein-losing, after modified Fontan procedure (CR); 115
Exercise, Doppler echocardiography of aortic narrowing during; 370
hypertension induced by; 301
oxygen consumption of patients with coronary artery aneurysms after; 226
ventilatory threshold determined by; 7
Extralobar sequestration, arterial supply and venous drainage in (CR); 57
Fast Fourier transform, of signal-averaged ECG in patients with Duchenne's muscular dystrophy; 91
Fetus, ventricular tachycardia with nonimmune hydrops in (CR); 192
Fibromuscular dysplasia, thromboembolic pulmonary hypertension due to (CR); 340
Filmless imaging, in pediatric cardiac management; 279
Fontan procedure, acute pulmonary embolism after (CR); 411
protein-losing enteropathy after (CR); 115
Gender, differences in longitudinal development of left ventricular end-diastolic dimension by; 169
effect on QT intervals; 135
Glucocorticoid therapy, combined with insulin, hypertrophic cardiomyopathy from (CR); 335

Glucose solution, as contrast media in Doppler echocardiography of systolic pressure; 175
Glycogen storage disease, type I, pulmonary vascular disease in patients with (CR); 265
Great arteries, left juxtaposed atrial appendages associated with dextrotransposition of (CR); 63
pulmonary hypertension and complete transposition of; 104
Head-up tilt test, unexplained syncope diagnosed by; 86
Heart disease, mass screening for; 297
Heart rate, effect on QT intervals; 135
Heart surgery, lung function after; 1
Hemodynamics, effect of stenotic valve geometry on; 155
Hemopericardium, as presenting finding of anomalous left coronary artery syndrome (CR); 198
Hypertension, exercise-induced, after surgery for coarctation of aorta; 301
thromboembolic pulmonary, due to disseminated fibromuscular dysplasia (CR); 340
Hypothermia, respiratory distress syndrome and; 391
Hytadid cysts, cardiac, with multivisceral involvement (CR); 268
Immunodeficiencies, neural crest cardiovascular defects and; 143
Inflammatory pseudotumor, rapid appearance of, in infant with CHD (CR); 400
Insulin therapy, combined with glucocorticoid, hypertrophic cardiomyopathy from (CR); 335
Interferon alfa-2a, pulmonary carernous hemangiomatosis treated with (CR); 332
Intracardiac tumor, newborn with ventricular tachycardia and (CR); 112
Iron deficiency, in children with cyanotic congenital heart disease; 150
Isthmic narrowing, after coarctation resection, effect of exercise on; 370
Jugular vein, balloon dilatation angioplasty of pulmonary artery stenosis in; 82
Juxtaposed atrial appendages, echocardiographic features of (CR); 63
Kawasaki disease, aerobic exercise function of patients with coronary artery aneurysms secondary to; 226
long-term outcome of coronary abnormalities in; 71
Left ventricle, congenital diverticulum of (CR); 254
involvement in arrhythmogenic right ventricular dysplasia (CR); 40
quantitative anatomy of; 97
Left ventricular defect, noncompaction of ventricular myocardium and (CR); 189
Left ventricular diastolic filling, effect of dobutamine on; 220
role of gestational age and body weight in; 242
Left ventricular end-diastolic dimension, longitudinal observations of, using echocardiography; 169
Left ventricular filling, effect of moderate acute right ventricle afterload increase on; 77
Left ventricular hypoplasia, associated with truncus arteriosus communis (CR); 322
Left ventricular pannus, causing inflow obstruction after mitral valve replacement (CR); 257
Leigh syndrome, cardiac mitochondrial dysfunction; 388
Ligamentum arteriosum, role in pulmonary sling as presenting finding of anomalous left coronary artery syndrome (CR); 201
Long QT syndrome, perinatal manifestations of (CR); 118
Lung function, after corrective heart surgery; 1
in patients with congeintal heart defects, pathologic parameters of; 314
Lymphangioma, intrapericardial, presenting as neonatal cardiac tamponade (CR); 129
Lymphangiomatous malformation, chylopericardium caused by (CR); 415
Lymphocytes, cardiovascular defects and abnormalities in; 143
Magnetic resonance imaging, aortic arch anomaly outlined by (CR); 403
aortic remodeling following balloon angioplasty shown by; 184
of absent pulmonary valve (CR); 35
Mitochondrial dysfunction, in Leigh syndrome; 388
Mitral regurgitation, after surgery for anomalous left coronary artery from pulmonary artery (CR); 271
proximal isovelocity surface area method for assessing; 351
Mitral valve, associated with truncus arteriosus communis (CR); 322
papellary fibroelastoma of (CR); 194
Mitral valve replacement, for endocardial fibroelastosis, inflow obstruction after (CR); 257
for mitral regurgitation in infants (CR); 271
Multicore myopathy, pterygium syndrome and hypertrophic cardiography associated with (CR); 53
Myocardial infarction, anomalous left coronary artery syndrome and as presenting finding of anomalous left coronary artery syndrome (CR); 198
Neonates, absent pulmonary valve syndrome in (CR); 35
aortopulmonary window and interrupted aortic arch in (CR); 122
cardiac tamponade caused by intrapericardial lymphangioma in (CR); 129
Doppler echocardiography of pulmonary arterial pressure in; 367
iatrogenic hypertrophic cardiomyopathy in (CR); 335
long QT syndrome and ventricular tachycardia in (CR); 118
with ventricular tachycardia and intracardiac tumor (CR); 112
Nitric oxide, effect on pulmonary arterial pressures in children with CHD; 246

Noonan syndrome, double-chambered right ventricle associated with (CR); 251
partial atrioventricular canal with left-sided obstruction and (LE); 278
Oxygen consumption, during heart catheterization; 207
of patients with coronary artery aneurysms; 226
Papillary fibroeleastoma, of mitral valve (CR); 194
Paralysis, periodic, effect of calcium channel blockers on (CR); 31
Partial trisomy 8p, congenital heart disease and (LE); 204
Patent ductus arteriosus, transcatheter vascular occlusion of; 181
Pericardial substitute, role in emergency resternotomy (CR); 397
Pericardium, open, left ventricular filling in presence of; 77
Polytetrafluoroethylene (PTFE) surgical membrane, as pericardial substitute, retrosternal adhesions limited by (CR); 397
Prednisone, protein-losing enteropathy after Fontan procedure treated by (CR); 115
Premature infants, Doppler transmitral flow velocity in; 242
Proximal isovelocity surface area method, mitral regurgitation assessed by; 351
Pseudohypertension, Williams syndrome and (LE); 132
Pterygium syndrome, multicore myopathy associated with (CR); 53
Pulmonary arterial pressure, effect of nitric oxide in oxygen on; 246
repeatability of four Doppler echocardiographic techniques for estimating; 360
Pulmonary arteriovenous fistulas, after cavopulmonary shunt (CR); 46
Pulmonary artery banding, Down syndrome influence on hemodynamic response to; 375
Pulmonary artery sling, development of (CR); 319
Pulmonary artery, Doppler echocardiography of systolic pressure of; 175
Pulmonary artery stenosis, in twins (CR); 125
internal jugular vain approach in balloon dilatation angioplasty of; 82
Pulmonary cavernous hemangiomatosis, interferon alfa-2a treatment of (CR); 332
Pulmonary embolism, catheter-directed lysis with rt-plasminogen for (CR); 411
Pulmonary hypertension, complete transposition of great arteries and; 104
secondary to CHD, serotonin turnover in children with; 214
Pulmonary sequestration, arterial supply and venous drainage in (CR); 57
Pulmonary sling, therapeutic strategy based on bronchoscopic evaluation of as presenting finding of anomalous left coronary artery syndrome (CR); 201
Pulmonary valve stenosis, associated with Noonan syndrome (CR); 251
Pulmonary vascular disease, atrial septal defect and glycogen storage disease and (CR); 265
Down syndrome and development of; 375
QT interval, effects of gender, age, and heart rates on; 135
Rahnella aquatilis, infective endocarditis caused by (CR); 108
Rashkind umbrella, perforation of right aortic valve cusp by (CR); 419
Recombinant tissue plasminogen activator, for pulmonary embolism after Fontan operation (CR); 411
Respiratory distress syndrome, hypothermia and; 391
Respiratory syncytial virus infection, congenital heart disease and; 163
Retroesophageal left aberrant innominate artery, right aortic arch with (CR); 403
Retrosternal adhesions, PTFE surgical membrane limits development of (CR); 397
Rhabdomyosarcoma, of heart presenting with intracranial pressure (CR); 260
Ribavirin, as treatment for respiratory syncytial virus; 163
Right ventricle, Doppler echocardiography of systolic pressure of; 175
double-chambered, associated with Noonan syndrome (CR); 251
left ventricular filling and acute loads applied to; 77
Right ventricular volume, in atrial septal defect, body surface isopotential T map of; 237
Salmonella typhimurium infection, of Blalock–Taussig shunt in infant (CR); 330
Serotonin turnover, in children with pulmonary hypertension secondary to CHD; 214
Signal-averaged electrocardiogram, fast-Fourier transform of; 91
Sinus node dysfunction, tuberous sclerosis and (CR); 51
Sinus venosus defect, cor triatriatum and (CR); 60
Subvalvar stenosis, development of, after truncus arteriosus repair o (CR); 394
Syncope, head-up tilt test for diagnosis of; 86
Tachycardia, supraventricular, efficacy and safety of atenolol for; 231
ventricular, amiodarone for management of (CR); 112
Duchenne's muscular dystrophy and; 91
effect of calcium channel blockers on (CR); 31
in hydropic fetus (CR); 192
in neonate with long QT syndrome (CR); 118
Thromboembolic pulmonary hypertension, disseminated fibromuscular dysplasia as cause of (CR); 340
Thrombolysis, catheter-directed, with rt-plasminogen, for pulmonary embolism (CR); 411
Transcatheter therapy, for closure of small patent ductus arteriosus; 181

Transmitral flow, role of gestational age and body weight in; 242
Tricuspid atresia, in siblings (CR); 327
Truncus arteriosus, functional subvalvar stenosis after repair of (CR); 394
Truncus arteriosus communis, mitral valve and left ventricular hypoplasia associated with (CR); 322
Tuberous sclerosis, sinus node dysfunction in (CR); 51
Valvar pulmonary stenosis, autosomal dominant inheritance of (CR); 408
Ventilatory threshold, oxygen uptake at, in CHD patients; 7
Ventricular myocardium, isolated noncompaction of (CR); 43
noncompaction of (CR); 189
Ventricular septal defect, congestive heart failure in infants with; 383
lung function in; 1
modified Rashkind umbrella for closure of (CR); 419
role in repair of truncus arteriosus (CR); 394
Ventricular workload, effect of stenotic valve geometry on; 155
Williams syndrome, pseudohypertension and (LE); 132
Yolk sac tumor, echocardiographic evaluation of (CR); 196

Pediatr Cardiol 17:430–433, 1996
